

TABLE OF CONTENTS

DISCLAIMER.....	ix
EXECUTIVE SUMMARY.....	x
PREFACE.....	xi
INTRODUCTION.....	xv
TIPS OF GETTING THE MOST FROM THIS REPORT.....	xv

UNIT 1.

LIST OF ILLUSTRATIONS AND TABLES.....	2
ILLUSTRATIONS -- UNIT 1.....	2
TABLES --UNIT 1.....	3
STAYING ON TARGET WITH ELEMENTAL ANALYSIS.....	4
DECIPHERING MECHANISMS FROM ACUTE INJURY AND INFLAMMATION.....	6
THE ACUTE RESPONSE: HOUSTON WE HAVE A PROBLEM.....	6
HEMOSTASIS: HOLD THE FORT.....	7
The extrinsic clotting cascade	
The fibrin clot – nature’s bandage	
The influence of tissue factor goes beyond coagulation	
COMMUNICATING INJURY: A CALL TO ACTION THROUGH PAR.....	11
PLATELETS: KIBBLE AND BITS	15
INFLAMMATION AND THE NEUTROPHIL: OUT WITH THE BAD.....	17
MONOCYTES TO MACROPHAGES: IN WITH THE GOOD.....	21
NF-KAPPAB: INFLAMMATION CENTRAL	23
HYPOXIA-INDUCIBLE FACTOR: TAKING INJURY IN STRIDE.....	26
HORMONES: MIFFED AT THE SITUATION.....	29
CONCLUSION: LAW AND ORDER.....	33
BIBLIOGRAPHY -- UNIT 1.....	34

UNIT 2.

LIST OF ILLUSTRATIONS AND TABLES

ILLUSTRATIONS -- UNIT 2.....	46
TABLES -- UNIT 2.....	47

RELATIONSHIPS IN BIOLOGICAL PROCESSES:

BIOLOGICAL PRIORITY-BASED ANALYSIS.....	48
--	-----------

WOUND GRANULATION:

ITS TRUE BIOLOGICAL SIGNIFICANCE.....	51
--	-----------

ANGIOGENESIS AND ITS RELATIONSHIP TO TISSUE FORMATION.....	53
--	----

FIBROBLAST GROWTH FACTORS: SUBTLE, COOPERATIVE, PERSUASIVE.....	54
---	----

HEPATOCTE GROWTH FACTOR: PIONEERING IN NEW TERRITORY.....	61
---	----

VASCULAR ENDOTHELIAL GROWTH FACTOR: THE DRIVING FORCE OF ENDOTHELIAL RESPONSE...	64
--	----

OTHER FACTORS THAT MODULATE ANGIOGENESIS AND REPAIR: THE CHORUS LINE.....	67
---	----

- Urokinase and Plasmin
- Activated Protein C

CONCLUSIONS ABOUT ANGIOGENESIS.....	72
-------------------------------------	----

WOUND GRANULATION AND ITS RELATIONSHIP TO DERMAL REPAIR.....	74
--	----

THROMBOSPONDIN: A MAESTRO OF DERMAL REPAIR.....	75
---	----

TRANSFORMING GROWTH FACTOR BETA: THE STABILIZING FACTOR.....	80
--	----

- TGFbeta Latency and activation
- Mechanism of TGFbeta Activation
- TGFbeta Signaling
- TGFbeta and Other Factors

THE CCN FAMILY, CONNECTIVE TISSUE GROWTH FACTOR AND CYR61: MOLECULES OF REPAIR AND REMODELING.....	92
--	----

- The CCN Molecules put repair and Remodeling on the Menu...
- Is Cyr61 (CCN1) the Real Star of Connective Tissue Regeneration?
- Connective Tissue Growth Factor
- Is CTGF the Real Culprit in Scarring and Fibrosis?

ANOTHER LOOK AT PLATELET-DERIVED GROWTH FACTOR: THE PROCESS ENHANCER.....	100
---	-----

THE MYOFIBROBLAST PHENOTYPE AND ITS ELUSIVE BIOLOGICAL SIGNIFICANCE.....	103
--	-----

CONCLUSION.....	105
------------------------	------------

BIBLIOGRAPHY -- UNIT 2.....	106
------------------------------------	------------

UNIT 3.

LIST OF ILLUSTRATIONS AND TABLES.....	132
ILLUSTRATIONS -- UNIT 3.....	132
TABLES -- UNIT 3.....	133
WOUND CLOSURE AND THE EPIDERMIS:	
THE BUCK STOPS HERE.....	134
THE EPIDERMIS: THE PARENCHYMAL COMPONENT OF SKIN.....	135
THE EPIDERMIS: IT TAKES A VILLAGE.....	136
EPIDERMAL RESPONSE TO INFLAMMATORY MEDIATORS: CONNECTIONS BETWEEN INNATE IMMUNITY AND HEALING.....	141
TNFalpha and the Keratinocyte Injury/Inflammation Response...	
NF-kappaB: Manipulating the Machinery...	
Peroxisome Proliferators-Activated Receptor...	
The Interleukins: A Toll Road	
JNK Signaling and Epidermal Differentiation	
EPITHELIAL INTERACTION WITH THE SUBSTRATUM: MASTER OR SLAVE?.	151
PARACRINE MODULATION OF KERATINOCYTE SIGNALING PATHWAYS: HGF AND KGF (FGF-7).	153
THE SKILL OF INTERPRETING PRECISELY WHILE THINKING BROADLY.....	156
THE POWER OF AUTONOMY: THE LITTLE EPIDERMIS THAT COULD.....	157
THE EPIDERMIS ON EDGE : FAILURE TO LAUNCH.....	158
How the Knowledge andTools Lead to Innovative Thinking– An Example	
THE EPIDERMIS AFTER CLOSURE: GETTING ON WITH LIFE.....	163
EGFR Ligands and IGF	
A FEW ADDITONAL NOTES.....	166
BIBLIOGRAPHY -- UNIT 3.....	167

UNIT 4.

LIST OF ILLUSTRATIONS AND TABLES.....	182
ILLUSTRATIONS -- UNIT 4.....	182
TABLES -- UNIT 4.....	183
WHEN THINGS GO BAD.....	184
DERMAL FIBROSIS AND SCARRING: WHAT IS TO BLAME?.....	185
THE FETAL WOUND: A MILIEU OF NATURAL INSTABILITY?.....	185
THE CHRONIC VENOUS ULCER: ULTIMATE CORRUPTION.....	190
LIPODERMATOSCLEROSIS: THE BAD ELEMENT MOVES INTO TOWN.....	192
EPIDERMAL BREAKDOWN: CORRUPTION THE EPIDERMIS CAN'T REFUSE.....	194
THE DIABETIC FOOT ULCER.....	198
UNDER PRESSURE: THE CONVERGENCE OF CONDITIONS THAT LEAD TO THE	
DIABETIC FOOT ULCER.....	199
Microangiopathy	
The Diabetic Environment: AGE Matters	
PRESSURE ULCERS: RESPONSE TO FORCE CONSTANTLY APPLIED.....	203
BURNS: AND THEN THERE WAS NONE.....	204
INFLAMMATION IN THE BURN WOUND: HIGHS AND LOWS.....	206
CONCLUSION.....	208
BIBLIOGRAPHY -- UNIT 4.....	209

UNIT 5.

LIST OF ILLUSTRATIONS AND TABLES.....	222
ILLUSTRATIONS -- UNIT 5.....	222
TABLES -- UNIT 5.....	223
MAKING THINGS WORK.....	224
THE REAL AND IMAGINED ISSUES IMPACTING WOUND HEALING PRODUCT DEVELOPMENT	225
THE KNOWLEDGE AND ANALYTICAL TOOLS IN ACTION.....	229
WOUND DRESSINGS: SIMPLY PROTECTING AND ENABLING OR CAN THEY CHANGE THE BIOLOGY?.....	229
BIOMATERIALS, MATRICES AND THE GOAL OF TISSUE FORMATION.....	231
Materials as Biological Agents	
Biomaterials: Engineered for Tissue Growth	
BIOCHEMICAL INTERVENTION: GREAT EXPECTATIONS...STILL.....	237
Inflammatory Mediators	
Angiogenic Factors	
Restorative Agents	
Regenerative Factors	
SEIZING THE POWER OF CELLS: BIOLOGICAL IN EVERY WAY.....	247
Wanted: Dead or Alive?	
Design and its Impact on Biological Signaling	
Fibroblasts – Designing for Biological Strength	
Form, Function and the Epidermal Keratinocyte	
Harnessing the Power of <i>In Vitro</i> Regeneration	
FINDING THE BEST FIT FOR A TECHNOLOGY: NO SQUARE PEGS....	257
PRODUCT STRATEGY AND PLACEMENT: MAKING PRODUCTS WITH A BETTER LIKELIHOOD OF MEETING CLINICAL EXPECTATIONS.....	257
NAVIGATING THE COMPETITIVE LANDSCAPE.....	262
USING A CUSTOMER FOCUS TO BUILD MARKET STRENGTH INTO YOUR PRODUCTS.....	263
PREDICTIONS ABOUT THE FUTURE: HIGH FLYING IN THE BLUE SKY	265
EVENTS LIKELY TO SHAKE-UP THE COMPETITIVE LANDSCAPE.....	265
THE WHEEL IS ROUND.....	267
TRAPS TO AVOID.....	267
TIPS FOR THOSE NEW TO THE TRADE.....	268
CONCLUSION.....	269
BIBLIOGRAPHY -- UNIT 5.....	270

VOLUME II

Illustrations and Tables

DISCLAIMER.....	3
ILLUSTRATIONS	
1. The Extrinsic Clotting Cascade.....	8-9
2. Acute Response – Overview.....	10-11
3. Tissue Factor Signaling.....	12-13
4. Proteases Communicate the Extent and Duration of the Injury.....	14-15
5. Protease-Activated Receptors Cooperatively Communicate Tissue Injury.....	16-17
6. The Broad Response Initiated by PAR Signaling.....	18-19
7. Phases of Leukocyte Infiltration in the Acute Wound.....	20-21
8. The Classical NF-KappaB Pathway.....	22-23
9. NF-KappaB Activation via PI3K/Akt.....	24-25
10. Resolution of Macrophage NF-KappaB Activation.....	26-27
11. Hypoxia-Inducible Factor (HIF) and Its Relationship to Wound Repair.....	28-29
12. Hormones Control the “Set Point” of Inflammation.....	30-31
13. Endothelial Cells and Angiogenesis: Unraveling Cause and Effect....	32-33
14. Fibroblast Growth Factor (FGF) Signaling Depends on Multiple Factors.....	34-35
15. Proteases: Urokinase Links to Cytokines, Matrix and Angiogenesis...	36-37
16. The Major Angiogenic Growth Factors and Their Relationship to Injury and Repair.....	38-39
17. Hepatocyte Growth Factor/Scatter Factor (HGF): Proteolytic Activation Upon Injury.....	40-41
18. Vascular Endothelial Growth Factor (VEGF) Signaling for Survival, Growth and Differentiation.....	42-43
19. Thrombomodulin and the Protein C Pathway.....	44-45
20. Integrin Receptors and Their Relationship to Tissue Repair.....	46
21. Thrombospondin and Its Relationship to Repair.....	47
22. Transforming Growth Factor Beta (TGFβ) Activation.....	48-49
23. TGFBeta Response is Governed by Context: The Balance of Smad-Dependent and Smad-Independent Signaling.....	50-51
24. The CCNs: CTGF and Cyr61 and Their Role in the Wound Response.....	52-53
25. Repair in the Balance: A Battle Between Regeneration	

and Stability?.....	54-55
26. Generation of a Chronic Venous Ulcer.....	56
27. Generation of a Diabetic Foot Ulcer.....	57
28. Burn Injuries.....	58
29. Staying on Target.....	59

TABLES

1. Platelet Activation – The Injury/Inflammation Phenotype (I/IP)	62-63
2. Activated Neutrophils – The Injury/Inflammation Phenotype (I/IP).....	64-65
3. Monocytes to Macrophages – The Injury/Inflammation Phenotype (I/IP).....	66-67
4. Endothelial Cells – the Injury/Inflammation Phenotype (I/IP).....	68-69
5. Dermal Fibroblasts – The Injury/Inflammation Phenotype (I/IP)....	70-71
6. Epidermal Keratinocytes – The Injury Inflammation Phenotype (I/IP).....	72-73
7. The Imperfect World of Dermal Regeneration.....	74
8. Chemokines.....	75
9. Chemokines Derived from Platelet Basic Protein (PBP).....	76
10. Chemoattractants.....	76
11. Fibroblast Growth Factor (FGF) Fact Sheet.....	77
12. Hepatocyte Growth Factor (HGF) Fact Sheet.....	78
13. Vascular Endothelial Cell Growth Factor (VEGF) Fact Sheet.....	79
14. Angiogenic Factors.....	80
15. Thrombospondin (TSP) Fact Sheet.....	81
16. Transforming Growth Factor Beta (TGFβ) Fact Sheet.....	82
17. The CCN Factors Fact Sheet.....	83
18. Extracellular Matrix (ECM) Fact Sheet.....	84
19. Matrix Metalloprotease (MMP) Fact Sheet.....	85
20. Platelet-Derived Growth Factor (PDGF) Fact Sheet.....	86
21. Interleukin 6 (IL-6) Fact Sheet.....	87
22. Comparison of Different Types of Wounds.....	88
23. Targeting the Problem in Different Wounds.....	89-91
24. Current Company Pipelines: Products and Potential Products.....	92-96
25. Building Market Strength into Your Product Strategy: A Customer-Focused Assessment Tool.....	97
GLOSSARY.....	98
